

AI for Your Business

A simple guide to **OpenRouter** and **GlbTOKEN**

■ OpenRouter

The model **supermarket** — one key to access 400+ AI models from OpenAI, Anthropic, Google, Meta and more.

■ GlbTOKEN

Your **local AI shop** — buy tokens the easy way, pay with local money or crypto, and use any AI model with one simple API.

Think of it like this:

OpenRouter is the **wholesale supplier**. GlbTOKEN is the **convenience store** that brings it to you — in your currency, with your payment methods.

Prepared for our partners & clients — July 2026

Who uses OpenRouter — and why

OpenRouter is one of the most popular AI gateways in the world. These are real, verifiable examples:

■ 1. Popular open-source apps

Apps like **LibreChat** (41,000+ GitHub stars), **Cline**, **Continue** and **Open WebUI** build OpenRouter in as a one-click option. Millions of developers use these tools every day — many of their AI calls travel through OpenRouter.

■■■ 2. Independent developers & startups

Instead of opening accounts at 10 different AI companies, they get **one API key** that works with 400+ models. One bill, one login, instant access to the latest models.

■ 3. Researchers & model shoppers

They compare models side-by-side — quality, speed, price — using the **same code**, then switch models with a one-line change.

■ 4. Pay-as-you-go users

No monthly subscription. Load credit, use it, top up when needed. Perfect for projects with unpredictable usage.

■ 5. Fans of open-source models

Models like DeepSeek, Llama and Mistral are available instantly — no need to rent your own servers.

Why they choose it: **one key for every model** · pay only for what you use · no subscription · works with any OpenAI-compatible code.

Who GlbTOKEN is built for

GlbTOKEN brings the same power closer to you — with payments that actually work in your market.

■ 1. Developers in emerging markets

No international credit card? No problem. Pay with **local currency, mobile money, Paystack or crypto** — and start building with AI in minutes.

■ 2. Small AI teams & startups

One dashboard to manage **everyone's usage, budget and API keys**. See who spends what, set limits, stay in control.

🏠 ■ 3. Creators, students & power users

Writers, coders and learners who use AI daily want a **simple top-up** — not a foreign card requirement.

■■ 4. Resellers & entrepreneurs

Buy tokens wholesale, **set your own prices**, and sell AI access to your own customers under your own brand.

■ 5. Anyone with existing AI code

GlbTOKEN is **100% OpenAI-compatible**. If your app already talks to OpenAI, it works with GlbTOKEN by changing one URL.

Why choose GlbTOKEN

What matters to you	OpenRouter	GlbTOKEN
International card needed	Yes	No — local money, mobile money, crypto
One key, many models	Yes	Yes
OpenAI-compatible	Yes	Yes
Team budget control	Limited	Built-in dashboard
Pay in your currency	No	Yes
Resell & set your own price	No	Yes
Local support	No	Yes

How it comes together

GlbTOKEN is your front door. Behind it, we connect to the best model suppliers — including OpenRouter — so you always get great models, great prices, and a payment method that works for you.

1■■ Sign up at GlbTOKEN → 2■■ Top up with your preferred payment → 3■■ Use any AI model through one simple, OpenAI-compatible API.
